

Environmental Policy Statement

It is our policy to operate our activities in a manner that takes account of all foreseeable risks and hazards to the environment and the persons who may be affected by it, and in accordance with the Environmental management systems – Requirements with guidance for use, standard ISO 14001.

We are committed to conducting our business in an ethical and socially responsible manner. This commitment is essential to sustainable business success. Our environmental objectives are established as we are committed to ensuring we conduct our operations in an environmentally responsible manner and protect the environment.

To achieve this the company has established the following environmental policy. All Flowline Group incorporating Clearaway Drainage Services managers and employees are to support the implementation of this policy in accordance with their roles and responsibilities in the organisation.

Product Utilisation; ensure that the products utilised during operations are safe, and that we minimise the use of hazardous materials, energy and other resources.

Pollution Prevention; conduct our operations in a manner that prevents pollution, conserves resources, reduces the use of raw materials, energy and supplies

Continual Improvement; integrate environmental management into our business and decision-making processes. Regularly measure our performance and practise continual improvement of our Quality & Environmental Management System (QEMS) to enhance environmental performance.

Legal Compliance; ensure that all products used and all operations comply with applicable environmental regulations and requirements including the Environmental Protection Act (1990).

To identify all reasonably foreseeable environmental risks and hazards associated with our activities in order to eliminate the threat of contamination to the environment. Where elimination is impossible, to introduce methods of monitoring and control.

Interested Parties; provide clear and candid environmental information about our services and operations to customers, stakeholders, employee's, government agencies and the public. Inform suppliers of products and services of our environmental requirements and encourage them to adopt sound environmental practices.

We as a company will actively seek to make this policy relevant to our activities, and will bring our aims and objectives to the attention of all our employees. We are also committed to seeing this policy work effectively with the intention of continually improving our environmental performance, and will implement a system of monitoring and auditing to check our progress.

As the person ultimately responsible for the environmental issues within the business I am responsible for making this policy work and for encouraging all employees to understand and operate within the framework of the policy. A copy of the policy statement will be displayed on notice boards around the business and is available on our web site at www.flowlineltd.co.uk.

This policy will be periodically reviewed by myself together with other managers and through our system of internal audits to determine its effectiveness. When necessary the policy will be amended and improved and any changes brought to the attention of each employee.

Signed:

Matthew Rowlett – Managing Director
